The specific conditions for operation of the water system are outlined in the pages attached to the permit. **Please provide a copy of this permit to anyone directly involved in the operation or sample collection for this water system.**

The Rules for Safe Drinking Water, Chapter 391-3-5, specify the number and frequency of chemical and microbiological samples that must be analyzed for your water system. The microbiological and chemical water samples must be analyzed by EPD's Laboratory or any other commercial laboratory certified by EPD. If you participate in EPD's "Drinking Water Fee System", the Drinking Water Compliance Program will schedule the chemical monitoring. Sample bottles with instructions for sample collection and shipping will be mailed to you as sampling is required. If you did not contract with the EPD for these laboratory services, you are responsible for complying with all applicable monitoring schedules in the Rules for Safe Drinking Water.

You are urged to become familiar with all applicable sections of the Rules for Safe Drinking Water, especially Section 391-3-5-.15 (Record Maintenance) and Section 391-3-5-.32 (Public Notification). **Remember that all bacteriological and chemical samples, information, and correspondence for this system that are submitted to EPD should be identified by the water system identification number, WSID# 2090007.**
